

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Antapлага dimidiata Grote. A new genus and species taken in Engelmann's Canon. The following is Prof. A. R. Grote's description, as published in the Canadian Entomologist, Vol. IX, p. 71:

"Head, thorax and basal third of fore wings white. Beyond, the wing is blackish brown, limited obliquely and a little unevenly from the white basal portion by the difference in color. A whitish subterminal shade. A discal mark obscurely indicated on the darker portion of the *wing*. Hind wings pale fuscous with white fringe; beneath whitish. Fore wings beneath fuscous. Expanse 30 mil. Hab. Colorado, Prof. Snow."

Melicleptria villosa Grote. A pair was taken in Engelmann's Canon.

Lygranthæcia brevis Grote. Engelmann's Canon.

Catocala Walshii Edw. Taken in Colorado Springs; also in Engelmann's and Clear Creek Canons.

Catocala aholibah Strecker. Engelmann's Canon.

Syneda Howlandii Grote. Vicinity of Colorado Springs.

Chlorosea biseriata Pack. Engelmann's Canon.

Tetracis Coloradaria Pack. Engelmann's Canon.

Endropia pectinaria. Engelmann's Canon.

Thamnonoma subcessaria Walk. Engelmann's Canon.

Eurycreon sticticalis Linn. Engelmann's Canon.

Asopia sp. An undetermined species. Engelmann's Canon.

Conchylis Ridingsana Robinson. Engelmann's Canon.

Number of species: Rhopalocera, 71; Heterocera, 33. Total Lepidoptera, 104.

LIST OF COLEOPTERA.

Collected near "Dome Rock," Platte Canon, Colorado, by the Kansas University Scientific Expedition for 1878.

By Prof. F. H. Snow.

Our collecting party spent twelve days (July 12th to 26th), in the above locality, thirty-one miles from Denver. Our camp was fixed at an estimated elevation of 7,500 feet above the level of the sea. My assistants were Messrs. Richard Foster and L. L. Dyche, students of the University. The collections consisted chiefly of plants, insects and birds. The following list is presented as a slight contribution to a better knowledge of the geographical distribution of American Coleoptera. My acknowledgments are due to Dr. John L. Le Conte and Dr. Geo. H. Horn, of Philadelphia, for the determination of species not previously in my cabinet. The numbers are those of Crotch's check-list.

22. *Cicindela purpurea* Oliv., var. *Audubonii* Lec.

30. *Cicindela 12-guttata* Dej.

160. *Carabus tædatus* Fab.

428. *Calathus ingratus* Dej.

514. *Platynus placidus* Say.

581. *Pterostichus protractus* Lec.

699. *Amara fallax* Lec.

709. *Amara obesa* Say.

1067. *Bembidium lucidum* Lec.

1723. *Boletobius dimidiatus* Er.
1977. *Bledius ruficornis* Lec.
2396. *Dermestes talpinus* Mann.
——. *Anthrenus* sp.
2434a. *Orphilus subnitidus* Lec.
2541. *Cypherotylus Boisduvali* Chev.
2681. *Nemosoma cylindricum* Lec.
2682. *Trogosita virescens* Fab.
2749. *Epuræa truncatella* Mann.
2755. *Nitidula ziczac* Say.
2767. *Meligethus ruficornis* Lec.
2853. *Cycloneda sanguinea* Linn.
2858. *Harmonia picta* Rand.
2882. *Hyperaspis fimbriolata* Mels.
2928. *Scymnus lacustris* Lec.
——. *Aphodius rudis* Lec.
3560. *Listrochelus falsus* Lec.
3715. *Buprestis consularis* Gory.
3716. *Buprestis Nuttalli* Kirby.
3718. *Buprestis maculiventris* Say.
3723. *Buprestis* (near) *adjecta* Lec.
3734. *Melanophila Drummondi* Kirby.
3736. *Melanophila gentilis* G. and H.
3738. *Anthaxia inornata* Rand.
3753. *Chrysobothris dentipes* Germ.
3791. *Acmæodera pulchella* Hbst.
——. *Microrrhagus* sp.
3902. *Anelastes Drurii* Kirby.
——. *Corymbites* n. sp.
4333. *Asaphes coracinus* Cand.
——. *Dietyoptera rubripennis* Lec.
4450. *Photinus corruscus* Linn.
4578. *Collops eximius* Er.
4628. *Attalus morulus* Lec.
——. *Clerus* n. sp.
4716. *Clerus ornatus* Say.
4718. *Clerus Nuttalli* Kirby.

 7364. *Tomicus pini* Say.

Number of species, 99.

ADDITIONS TO THE CATALOGUE OF KANSAS COLEOPTERA.

By A. E. Popenoe, Topeka.

The following list of additions to the Catalogue of Kansas Coleoptera includes in great part the results of the collections of 1877 and 1878, made in different localities by Prof. F. H. Snow and the writer. The species were determined by Dr. John L. Le Conte, of Philadelphia, to whom thanks are due for many favors. Those species noted from Lawrence are added by Prof. Snow. The additions number 435, increasing the list total to 1711 species.

49. *Cicindela lepida* Dej. Lawrence; taken by A. E. Blood.
 67. *Cicindela Pilatii* Guer. Lawrence; taken by C. B. Cramer.
